Knox County Health Department: COMMUNICABLE DISEASE REPORT

MONTHLY SUMMARY

This monthly report contains case information for March 2018 and compares the numbers to an adjusted average calculated from archived data. The adjusted average accounts for the communicable diseases reported for March 2018 and estimates the number of expected cases for the month based off of data from 2013- 2017. The case classification status is included with each disease report and is subject to change once more information is obtained.

Communicable disease activity for March included cases of Chlamydia, Cryptosporidiosis, Gonorrhea, Hepatitis B (including delta) - chronic, Hepatitis C - chronic, Influenza-associated hospitalization, Salmonellosis, and Varicella. Gonorrhea, Hepatitis C - chronic, and Varicella were all above their expected baselines for the month. All other reported diseases were either at or below their expected averages. None of the reported diseases for the month required activation of the KCHD Epi Response Plan.
