Knox County Health Department: COMMUNICABLE DISEASE REPORT

MONTHLY SUMMARY

This monthly report contains case information for May 2018 and compares the numbers to an adjusted average calculated from archived data. The adjusted average accounts for the communicable diseases reported for May 2018 and estimates the number of expected cases for the month based off of data from 2013- 2017. The case classification status is included with each disease report and is subject to change once more information is obtained.

Communicable disease activity for May included cases of Chlamydia, E.coli - Unknown serotype, Gonorrhea, Hepatitis C - chronic, Lyme Disease, Salmonellosis, and Rocky Mountain spotted fever. Cases of Chlamydia, E.coli - Unknown serotype, Gonorrhea, Lyme Disease, and Rocky Mountain spotted fever all exceeded their expected baselines. Hepatitis C - chronic and Salmonellosis were at their expected averages for the month. None of the reported diseases for the month required activation of the KCHD Epi Response Plan.
