

FOOD SAFETY PROGRAM PLAN REVIEW SUBMITTAL PACKET

Facility Layout & Equipment Specifications

11660 Upper Gilchrist Rd., Mount Vernon Ohio 43050 Phone: (740) 392-2200, Ext. 2222

Fax: (740) 392-9613 www.knoxhealth.com

Licensing

All food businesses in Knox County are required by Ohio law to have a food service operation or retail food establishment license issued by Knox County Health Department (KCHD). All new food service operations/retail food establishments and those performing extensive alterations or remodeling must complete the plan review process.

If you have any questions regarding plan approval or licensing, please contact the Food Safety Program at (740) 392-2200 or eh@knoxhealth.com.

Getting Started

Step 1: Submittal of Plans (application should be submitted at least 30 days prior to construction)

- Complete the attached Plan Review Application.
- Submit one (1) complete set of drawings and other applicable information for the facility.
- Submit menu or complete list of food and beverage items to be sold.
- Submit the plan review fee of \$200.00 for a new construction or \$100.00 for extensive alterations or remodeling to a current licensed food service operation or retail food establishment. Checks can be made payable to the Knox County Health Department.

Step 2: Plan Review Process

- Written approval, disapproval, or a request for additional information will occur within 30 days of receipt of the application and plan review fee.
- Plan review submittals not acted upon expire one (1) year upon receipt.

Step 3: Construction

- Ensure that all contractors and subcontractors are properly licensed.
- Ensure that your contractors obtain all of the necessary permits for electrical and structural through the Ohio Department of Commerce Division of Industrial Compliance (614)644-2223 and necessary permits for plumbing from Richland Public Health Plumbing Services Division (419)774-4500. KCHD contracts with Richland Public Health to administer the commercial plumbing program in Knox County.
- Contact your local Fire Department for inspection of your facility.

Step 4: Inspection

- Prior to opening your establishment, you must pass a pre-licensing inspection by KCHD.
- The license will not be issued until the facility meets all of the applicable code requirements at the time of the pre-licensing inspection.
- You must submit written documentation that all of the electrical, structural, plumbing and/or fire inspections have been completed and passed before a license will be issued.
- The application for the license will be made available at the pre-licensing inspection if the inspection is successfully passed. The signed application and fee must be provided to KCHD prior to opening. KCHD accepts cash, checks, credit cards or money orders.

Note: KCHD personnel will make all attempts to accommodate your timeline for the pre-licensing inspection. Please contact us at least 10 business days in advance of your target opening date to schedule this inspection. Planning ahead helps avoid scheduling conflicts and allows time for reinspections, if necessary.

Content & Format Requirements for Submittal

The facility layout and equipment specifications submitted for review must meet all of the requirements of Chapter 3717-1-09 of the Ohio Administrative Code. The submittal must include the following components:

- 1. The type of operation or establishment proposed and a complete list of food items to be prepared, served, or sold (menu).
- 2. A facility floor plan illustrating the layout of fixtures and other equipment. These specifications must be legible and be drawn reasonably to scale. Electronic submission of plans is subject to approval by the plan reviewer. Often electronic plans are difficult to read and must be printed to be reviewed.
- 3. The total square footage to be used by the food service operation or retail food establishment.
- 4. A detailed drawing of the portions of the premises being used including all entrances exits, loading/unloading areas, and docks, etc.
- 5. A site plan of your property that includes the following:
 - a. Drawing showing an arrow indicating north; location of the business in a building such as a shopping mall or stadium;
 - b. Location of building onsite, including alleys, streets, and location of any outside support infrastructure such as dumpsters, potable water sources, sewage treatment systems;
 - c. Interior and exterior seating areas.
- 6. A plumbing plan including the location, number, and types of plumbing fixtures; include all water supply facilities.
- 7. A lighting plan, both natural and artificial, with the number of foot-candles indicated for critical surfaces.
- 8. A complete list of building materials and surface finishes to be used for each room including the floors, walls, ceilings and coved wall/ juncture bases. Note: floors, walls and ceiling tiles installed in food preparation areas, restrooms, and ware washing areas must be nonabsorbent, smooth and easily cleanable surfaces.
- 9. A list of all equipment with the manufacturer name and model numbers listed. Only commercial equipment approved by a recognized food equipment testing agency, as acceptable for use in a food service operation or retail food establishment, will be accepted as specified under rule 3717-1-04.1(kk) of the Ohio Administrative Code.
- 10. Label and locate all dedicated hand sinks and dump sinks. Where applicable, dump sinks may be required (i.e. behind bars, front portions of convenience stores, etc.) that are separate from designated hand sinks. Dual-use sinks are not permitted and will not be accepted.

Note: All materials submitted for review become property of Knox County Health Department and are subject to record retention laws. As such you are responsible for making your own copies of the materials submitted.

What Is My Risk Level?

Food facilities are licensed as a Risk Level I, II, III, or IV. Risk levels reflect the potential risk that a facility poses to Public Health and are based on the highest risk level activity of the food service operation/food establishment in accordance with the following criteria:

Risk level I: poses potential risk to the public in terms of sanitation, food labeling, and sources of food, storage practices, or expiration dates. Examples of risk level I activities include, but are not limited to, an operation that offers for sale or sells:

- (1) coffee, self-service fountain drinks, prepackaged non-potentially hazardous beverages;
- (2) pre-packaged refrigerated or frozen potentially hazardous foods;
- (3) pre-packaged non-potentially hazardous foods;
- (4) baby food or formula
- (5) food delivery sales operations
- (6) micro-markets

Risk level II: poses a higher potential risk to the public than risk level I because of hand contact or employee health concerns but minimal possibility of pathogenic growth exists. Examples of risk level II activities include, but are not limited to:

- (1) handling, heat treating, or preparing non-potentially hazardous food;
- (2) holding for sale or serving potentially hazardous food at the same proper holding temperature at which it was received;
- (3) heating individually packaged commercially processed potentially hazardous foods for immediate service;

Risk level III: poses a higher potential risk to the public than risk level II because of the following concerns: proper cooking temperatures, proper cooling procedures, proper holding temperatures, contamination issues or improper heat treatment in association with longer holding times before consumption, or processing a raw food product requiring bacterial load reduction procedures in order to sell it as ready-to-eat. Examples of risk level III activities include but are not limited to:

- (1) handling, cutting, or grinding raw meat products;
- (2) cutting or slicing ready-to-eat meats and cheeses;
- (3) assembling or cooking potentially hazardous food that is immediately served, held hot or cold, or cooled;
- (4) operating a heat treatment dispensing freezer;
- (5) reheating in individual portions only; or
- (6) heating of a product, from an intact, hermetically sealed package and holding it hot;

Risk level IV: poses a higher potential risk to the public than risk level III because of concerns associated with: handling or preparing food using a procedure with several preparation steps that includes reheating of a product or ingredient of a product where multiple temperature controls are needed to preclude bacterial growth; offering as ready-to-eat a raw potentially hazardous meat, poultry product, fish, or shellfish or a food with these raw potentially hazardous items as ingredients; using freezing as a means to achieve parasite destruction; serving a primarily high risk clientele including immuno-compromised or elderly individuals in a facility that provides either health care or assisted living; or using time in lieu of temperature as a public health control for potentially hazardous food. Examples of risk level IV activities include, but are not limited to:

- (1) reheating bulk quantities of leftover potentially hazardous food more than once every seven days;
- (2) caterers or other similar food service operations that transport potentially hazardous food;
- (3) non-continuous cooking
- (4) performing a food handling process that is not addressed, deviates, or otherwise requires a variance for the process according to rules adopted pursuant to section 3717.05 of the revised code. These facilities will need to have a written HACCP plan for these activities. Examples of these risk level IV variance activities include, but are not limited to:
 - a. reduced oxygen packaging;
 - b. smoking for preservation,

Types of Food Establishments

- 1. **Food Service Operation (FSO)** Primary business is the on-site preparation and/or consumption of ready to eat foods in individual portions (for ex. restaurants, caterers, carry outs preparing individual meals, fast food operations, nursing homes, day cares, schools, hospitals, etc.)
- 2. **Retail Food Establishment (RFE)** Primary business is the sale of food in bulk portions for off premise consumption and/or preparation (for ex. grocery stores, drive-thrus, carry outs, pizza shops, gas stations, micromarkets, etc.)

Primary business is defined through sales volume. If your facility operates as both a food service operation (FSO) and retail food establishment (RFE), whichever portion of your business has the greater sales volume (51% or more) determines your designation (either FSO or RFE).

Education Requirements

As of March 1, 2010 the Ohio Revised Code requires that **all** food service operations and retail food establishments opened after this date have at least one person-in-charge <u>per shift</u> that has a level one certification in food protection or an equivalent approved training prior to the business being licensed.

As of March 1, 2017, each risk level 3 and risk level 4 food service operation and retail food establishment must have at least one management or supervisory employee with a level two certification in food protection. This certification is obtained through the Ohio Department of Health after completing an approved course (15 hours of instruction and passing a comprehensive exam). A ServSafe® certificate itself and the level one certificate does not comply with this rule.

Plan Review Checklist

The following information must be included as part of your plan review.

Please indicate that the following components are included ($\sqrt{\ }$) or not applicable (N/A)

Components	(√) or (N/A)	Official Use Only
Plan review fee of \$200.00 for new construction or \$100.00 for remodel or extensive alteration made payable to Knox County Health Department		
Type of facility proposed (FSO, RFE)		
Proposed Menu (complete list of food items to be prepared, served, or sold)		
Facility floor plan or layout, drawn reasonably to scale (to include):		
 total square footage to be used 		
 restroom location(s) 		
 location of entrances and exits 		
 location of dry goods and chemical storage areas 		
 location of personal belongings storage 		
 location of designated hand sinks 		
 location of the three compartment sink 		
 location of food preparation sink (must have indirect waste line) 		
 location of mop sink 		
• location of dish machine- indicate □ Low or □ High temperature		
location of all equipment		
Site Plan (to include):		
 drawing showing an arrow indicating north 		
 location of the business in a building such as a shopping mall or stadium 		
 location of building onsite, including alleys, streets, and location of any outside support infrastructure such as dumpsters 		
 potable water source, sewage treatment system 		
 interior and exterior seating areas 		
Lighting Plan		
Interior finish schedule (materials for floors, walls, ceilings, and coving)		
Equipment list , include make and model numbers (commercial equipment only, NSF or equivalent)		
Plumbing Plan (location, type, and number of all plumbing fixtures)		
Education : indicate □ Level One and/or □ Level Two Certification		

Failure to provide all information may result in a delay or disapproval of your submittal.

Food Protection & Storage

Will there be at least one person-in-charge per shift with a minimum of Level One Certification in Food Protection? □ YES □ NO
Will there be at least one PIC that has management or supervisory responsibilities with a Level Two Certification in Food Protection? \Box YES \Box NO
Are copies of the employee Level One and Level Two (if applicable) certificates enclosed? □ YES □ NO
Do you have a written sick policy that ensures your food employees are informed (in a verifiable manner) of their responsibilities to report to the PIC information about their health as it relates to diseases that are transmissible through food? \Box YES \Box NO
Do you have a written procedure for employees to follow when responding to vomiting or diarrheal events that addresses how to minimize the spread of contamination and the exposure to employees, consumers, and surfaces? \Box YES \Box NO
If this operation performs a food handling process that is not addressed, deviates, or otherwise requires a variance (such as reduced oxygen packaging, smoking for preservation, bottling or canning) is the required written HACCP plan enclosed? \square YES \square NO \square N/A
Will each refrigerator, freezer, or warmer have a temperature measuring device? \Box YES \Box NO \Box N/A
Will food shields be used to protect foods on display? \Box YES \Box NO
Will temperature measuring devices be provided, readily accessible, and properly calibrated to ensure that the temperature of the food product is being accurately measured? \Box YES \Box NO \Box N/A
Will shelving space be available for dry goods storage? □ YES □ NO
Will food be stored at least 6 inches above the floor on commercially certified equipment? \Box YES \Box NO
Is the required menu or list of food items to be prepared, served, or sold enclosed? \Box YES \Box NO
Equipment/ Utensils
Will all equipment and utensils be commercially certified NSF or equivalent? □ YES □ NO
Is the required equipment list with make and model numbers enclosed? \Box YES \Box NO
If utensils used with moist foods such as ice cream, or mashed potatoes are not stored in the product, will the required dipper well be provided? \Box YES \Box NO \Box N/A
Are all containers used to store bulk food products constructed of safe materials designed to be in direct contact with food? \Box YES \Box NO \Box N/A
To provide for easy cleaning will equipment be installed with: \Box casters \Box gas disconnects \Box a seal at the wall and floor \Box sufficient open space
Warewashing
What method of warewashing will be used: □ Manual(Required) □ Mechanical □ Both ?

Manual Warewashing

Will the dimensions of the three-compartment sink be large enough largest food contact surface (including large pots & pans)? \Box YES		date immersi	on of the
